

PSLV-C62/EOS-N1 mission with primary satellite and 15 co-passengers, lifted-off on January 12, 2026 at 10:18:30 IST, from the First Launch Pad at Satish Dhawan Space Centre, Sriharikota. The first two stages of PSLV performed nominally. However, due to an anomaly encountered during the third stage, the satellites could not be placed in the intended orbit.

One of the co-passengers on this mission was KID capsule, which was planned for ballistic re-entry into the Earth's atmosphere. As confirmed by the customer, telemetry data from the KID capsule has been successfully received.
